

AI PERSONA · STYLING STUDIO

Visual Persona Studio

Your personal stylist, in your phone.

One photo — meet a better you.

Product Introduction

Presenter · Date

THE PROBLEM

Every morning starts with the *same question*.

"What do I wear today?" — and most people answer it under stress, in a hurry, alone.

01

No expert eye

Hard to know what flatters your face shape, body and skin tone.

02

Endless combinations

Hair, tops, bottoms, shoes — too many options, no easy way to compare.

03

Try-on is costly

Fitting clothes physically takes time, money and second-guessing.

THE SOLUTION

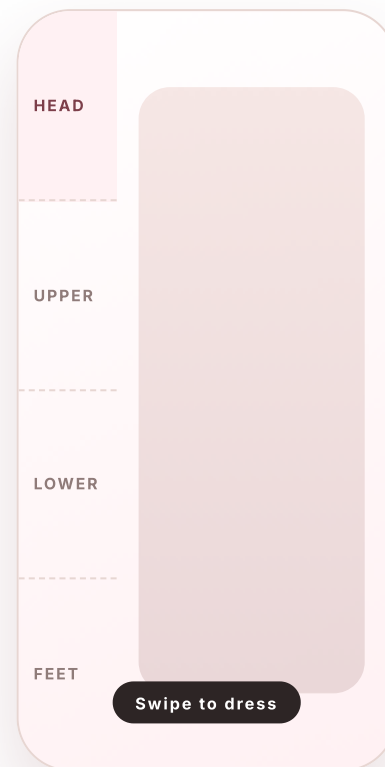

A stylist that *sees you* — and dresses you.

Upload one photo. Visual Persona Studio analyzes your features, builds a full-body you, and lets you restyle head-to-toe with a swipe.

AI analysis

Swipe to restyle

One-tap try-on

HOW IT WORKS

From a photo to a finished look — in four steps

1

Capture

Upload your photo, or pick a demo persona to start instantly.

→ 2

Full-body you

AI derives a normalized full-body reference at a fixed ratio & pose, keeping your identity.

→ 3

Restyle

Swipe head / upper / lower / feet to switch outfits and accessories live.

→ 4

Try it on

One tap renders a photorealistic shot of you wearing the chosen look.

FEATURE 01

It reads *you* first

Before suggesting anything, the AI profiles what makes your styling work.

◆ Face & body

Face shape, skeletal proportions, shoulder-to-waist, leg-to-body.

◆ Color matching

Warm / cool undertone and a personalized palette.

◆ Tailored advice

Key focus, accessory tips — written for your profile.

Profile DNA

Oval face · Hourglass

Warm undertone · balanced proportions

FEATURE 02 · CORE

Four zones. *One swipe.*

The body splits into **Head** · **Upper** · **Lower** · **Feet**. Swipe each zone to switch looks instantly — and steer any zone with quick tags or a free-text request.

Head

Short, long, perm, bangs, center part...

Upper

Shirt, knit, jacket, hoodie, oversized...

Lower

Slacks, denim, wide, skirt, tapered...

Feet

Sneakers, leather, loafers, boots...

Per-zone tuning: **10 guidance tags** + a description box regenerate just that zone — the rest stays put.

FEATURE 03

Try it on — *for real*

One tap composites the outfit onto your full-body photo, preserving your face and identity. Engineered to stay fast and cheap.

◆ **Smart, not wasteful**

81 combinations would mean 81 renders — we don't do that.

◆ **Few calls, full coverage**

1 full-body + 1 accessory sheet + 1 render per applied look.

BEYOND THE LOOK

One look, many keepsakes

Lookbook image

Save a clean, shareable outfit card in one click.

Editorial poster

Magazine-grade fashion poster, print-ready.

3D crystal & figures

Turn your persona into physical merch — a monetization path.

UNDER THE HOOD

Built for the cloud, secure by design

Client

React + Vite

Fast, responsive fitting-room UI with live swipe & overlays.

Server

Gemini, server-side

3.5 Flash for analysis, Nano Banana 2 for images.
Keys never reach the browser.

Deploy

Cloud Run

Auto-injected secrets, scales on demand, one-click publish.

The browser only calls our own API; all generation runs safely server-side.

WHAT'S NEXT

Every morning, *more yourself.*

Multi-pose & scenes

Seasonal, occasion-based and full-scene styling.

AR fitting

Live try-on through the camera.

Community

Share looks, vote, and shop the style.
